

Robo-Tracker

Description

Roboticians will build and program a mobile robot that will track a black line. The robot that tracks the course the fastest will be declared the winner. When the robot finishes the course it must sing a victory song.

Rules

1. The robot must stay on the course (line) in order to qualify as the winner.
2. The robot must sing a victory song when it completes the course.
3. Any robot touched by an operator after the program begins is disqualified.
4. The robot with the fastest time wins.
