

# We're Celebrating Our 50th Birthday! (Products — Not Years)

*Sea-Bird* demonstrates its continual commitment to advancing the science of ocean measurement with the *birth* of our new SBE 50 pressure sensor. Since our founding in 1979, we have developed 50 products covering a broad range — CTD profilers, multi-bottle *in-situ* water samplers, moored CT recorders, wave and tide recorders, thermosalinographs, OEM CTD modules for profiling floats, and a variety of modular instruments for measuring conductivity, temperature, pressure, and dissolved oxygen — along with software to make acquiring and processing data from our products easy. Our continuing commitment to providing the highest quality and unsurpassed customer service allows you to deploy *Sea-Bird* equipment with confidence.
