

Upgrade your Estuarine and Coastal Oceanography with the New ECO Sampler

Sea-Bird's SBE 55 ECO Water sampler is a new easy-to-handle sampler with oceanographic research-quality features and small-boat compatibility. It integrates with a Sea-Bird CTD to provide autonomous water sampling at user-selected depths. The ECO Sampler's magnetically actuated lanyard release latch is derived from the SBE 32 Carousel Water Sampler and has a proven history of reliability and ease-of-use.

- Economical, lightweight system includes bottles
- 3-bottle or 6-bottle configurations, 4 liters per bottle
- Open structure for better flushing / less drag and room to mount auxiliary sensors
- Real-time capability with optional Deck Unit (requires slip-ring equipped winch and conducting cable)
