

Sea-Bird Electronics Training for Data Collection in the Ocean

Table of Contents

Module 0 - Introduction

Topics Covered by Course	2
Sea-Bird Company History	8
Sea-Bird Organization.....	12
Introduction: Ocean Profiling.....	16
Oceanographic Terms and Parameters	18

Module 1 - Introduction to Profiling Equipment

Overview.....	2
Profiling Products: SBE 911 <i>plus</i> , 19 <i>plus</i> V2, 25, and 49.....	3
Specialty Profiling Products: SBE 52-MP, Glider Payload CTD, SBE 41/41CP	5
Real-Time Profiling: SBE 911 <i>plus</i>	6
Internally Recorded Profiling: SBE 19, 19 <i>plus</i> , 19 <i>plus</i> V2, and 25.....	7
Conductivity, Temperature, and Pressure Sensors	8
SBE 19 vs. SBE 19 <i>plus</i> / 19 <i>plus</i> V2, Sensor Placement	9
Calculating Memory Capacity and Battery Endurance	10
SBE 9 <i>plus</i> / 11 <i>plus</i> Telemetry.....	14
SBE 9 <i>plus</i> Frequency and Voltage Acquisition	17
Modular Sensors.....	19
SBE 9 <i>plus</i> End Cap Connections	20
Real-Time Operation for Internally Recording Instruments	21
Water Sampling Equipment	22
Water Sampling in Real-Time for Internally Recording Instruments	25
Autonomous Water Sampling	26
Autonomous Operation for SBE 9 <i>plus</i>	28
Autonomous Profiling: SBE 41 and 41CP	29
Activity - Install Seasoft and Course Data	30

Module 2 - Setup and Acquiring Data

Overview.....	2
SeatermV2: User Interface for Internally Recorded Instruments	3
Activity - Collect Data with CTD	7
SeatermV2: Headers and Uploading Stored Data	10
Activity - Upload Data from CTD	13
SeatermV2: Capturing ASCII Data.....	14
Seasave: Real-Time Data Acquisition.....	15
Seasave: Setup of Instrument Configuration (.con or .xmlcon file) for Real-Time Acquisition	17
Activity - Create a Configuration (.con) File in Seasave	20
Seasave: Displays.....	21
Seasave: Displaying Archived Data	22
Activity - Display Archived Data.....	23
Seasave: Configuring for Real-Time Data Collection.....	24
Seasave: Saving the Setup.....	38
Seasave: Acquiring Real-Time Data	39
Seasave: File Types.....	40
Using Internally Recording Instruments for Real-Time Applications.....	44
Water Sampling with Internally Recording Instruments	46
Activity - Take a Bench Cast with Seasave.....	47

Module 3 - Data Conversion and Plotting

Overview	2
Activity – Run Seasave	4
Data Processing Flow Chart and User Interface	5
Data Conversion to Scientific Units	6
Activity - Run Data Conversion	14
Data Display: Sea Plot	15
Activity - Run Sea Plot	23

Module 4 - Water Sampling and Deployment

Overview	2
Water Sampling Components – SBE 32 Carousel and SBE 55 ECO Water Samplers	3
Water Sampler Maintenance and Water Bottle Lanyards	5
Water Sampling with Internally Recording Instruments	6
SeatermAF: User Interface for Auto Fire Module (AFM) and SBE 17 <i>plus</i> V2	7
Real-Time Data and Water Samples from an Internally Recording Instrument	15
Deployment Issues: Components, Cabling, Grounding, Terminations, Instrument Plumbing, Connections, Final Preparation, Soaking, Using CTD in Cold Places	17
Data Conversion and Bottle Summary: Correlating CTD Data with Water Samples	32
Activity - Run Data Conversion and Bottle Summary	38

Module 5 - Miscellaneous Applications

Overview	2
Fresh Water Applications	3
Specific Conductance	4
Sound Velocity	5
Adding Navigational Data	6
Adding Surface PAR	7
Supporting Custom Sensors	8
Adding 9600 Baud Data Channel to 911 <i>plus</i>	9
Adding RS-232 Serial Output Interface to 911 <i>plus</i>	10
Thermosalinographs: SBE 21 and 45	11
Thermosalinographs: Example Installation and Data	20

Module 6 - Making Measurements in the Ocean

Overview	2
How Sensors Work and Sensor Response Times	3
Sampling and Profiling Rates	15
Activity - Compare Resolution of SBE 19 and 25 Data	19
Coordinating Measurements in Time and Space	20
Estimating Conductivity and Temperature Resolution	29
Activity - Analyze Data from Profile with Slow Descent Rate	34

Module 7 - Getting the Highest Accuracy Data

Overview	2
Thermometers: Care and Drift	3
Conductivity Sensors: Care and Drift	5
Oxygen Sensors: Care and Drift	10
pH Sensors: Care	13
Pressure Sensors: Care and Drift	14
Calibration: Converting Sensor Output to Scientific Units	16
Using Calibrations to Improve Data	26
Calculating Parameters with SeacaleW	38
Activity - Correct T and C using Pre- and Post-Cruise Calibrations	39

Module 8 - Getting the Highest Accuracy Data, Continued

Overview	2
Field Calibrations	3
Field Calibrations: Pressure	4
Field Calibrations: Temperature.....	9
Field Calibrations: Discrete Sampling for Conductivity and Dissolved Oxygen.....	10
Field Calibrations: Conductivity	14
Field Calibrations: Dissolved Oxygen	22
PALACE Float: Minimal Conductivity Drift.....	43
Activity - Correct Conductivity with Water Samples	45

Module 9 - Advanced Data Processing

Overview	2
Data Processing: SBE 911 <i>plus</i> and SBE 19 <i>plus</i> /19 <i>plus</i> V2.....	3
Activity - Convert Data	5
Filtering Conductivity	6
Aligning Temperature and Conductivity Data	8
Activity - Align C and T Data.....	14
Aligning Dissolved Oxygen Data.....	17
Activity - Align DO Data	20
Compensating for Conductivity Cell Thermal Mass	22
Activity - Correct for Cell Thermal Mass	25
Filtering Pressure for Digitization Effects.....	27
Removing Data Artifacts Induced by Ship Heave.....	30
Activity - Remove Ship Heave Effects	34
Ancillary Data Processing.....	36
Bin Averaging	37
Activity - Run Bin Average	43
Data Processing Tips.....	45
Batch Processing a Large Number of Files	46
Activity - Batch Process Files	53

Module 10 - Moored Instruments

Overview	2
Introduction to SBE 16 SEACAT Family	3
Introduction to SBE 37 MicroCAT Family.....	4
Introduction to SBE 39 Family and SBE 56	5
Inductive Modem Telemetry	6
Inductive Modem Instruments – SBE 44, UIMM, and OEM Components	12
Memory Capacity.....	15
Battery Endurance.....	21
Activity – Calculate Battery Endurance for SBE 37	31

Module 11 - Setup of Moored Instruments

Overview	2
Resolution and Sampling Theory	3
SeatermV2 and Seaterm: User Interface	6
Status Report and Data Headers	9
Data Formats	11
Activity - Collect data with SBE 37.....	16
Converting Sensor Output to Scientific Units	17
Activity - Convert and Plot Time Series Data.....	19
Preparing for Deployment.....	20
Preparing for Deployment: Sensor Check, Clocks, and Cables	21
Preparing for Deployment: SBE 16 <i>plus</i> and 16 <i>plus</i> V2 Pump Operating Modes.....	24
Preparing for Deployment: Dissolved Oxygen Sensors	25
Preparing for Deployment: Starting Logging	28
Preparing for Deployment: Inductive Modem Systems	29

Module 12 - Getting the Highest Accuracy Data from Moored Instruments

Overview	2
Care of Sensors in the Field	3
Care of Sensors in the Field: Temperature and Pressure, Conductivity and Dissolved Oxygen	4
Care of Sensors in the Field: Conductivity.....	5
Care of Sensors in the Field: Dissolved Oxygen	9
Correcting Data with Pre- and Post-Deployment Calibrations.....	11
Correcting C and T Data with Pre- and Post-Deployment Calibrations: Example.....	13
Conductivity: Positive Drift	16
Correcting Data by Comparing to Profiling Data.....	18
Correcting C and T Data by Comparing to Profiling Data: Example.....	19
Correcting Oxygen Data.....	22
Activity – Compute Correction Factor for Oxygen Soc.....	32
Computing Rate of Change for Oxygen Soc.....	33
Activity – Compute Rate of Change for Oxygen Soc	34
Correcting Oxygen Data: Example	35

Module 13 - Wave and Tide Instruments: Theory and Setup (reference only)

Overview	2
SBE 26 Wave and Tide Recorder.....	3
SBE 26 <i>plus</i> Wave and Tide Recorder	4
Measuring Tides.....	5
Measuring Waves.....	6
Deployment Planning: Plan Deployment	20
Setting Up the SBE 26	26
SBE 26 Measurement Sequence	27
Setting Up the SBE 26 <i>plus</i>	28
SBE 26 <i>plus</i> Measurement Sequence	29
Adding Conductivity.....	30
Battery and Memory Endurance.....	31
Deployment and Recovery Summaries	32
Removing Barometric Pressure from Tide Data	34
Troubleshooting an SBE 26	35
Troubleshooting an SBE 26 <i>plus</i>	36

Module 14 - Wave and Tide Instruments: Data Processing (reference only)

Overview	2
Separating Data into Wave Data and Tide Data: Convert Hex	3
Activity - Split .hex Data into .wb and .tid Files with Convert Hex	6
Processing Wave Measurements: Process Wave Burst Data	7
Activity - Run Process Wave Burst Data	13
Tabulating Wave Data: Create Reports.....	14
Activity - Run Create Reports.....	17
Removing Barometric Pressure from Tide Data: Merge Barometric Pressure.....	18
Graphing Wave and Tide Data: Plot Data.....	20
Wave and Tide Example	23
Activity - Run Plot Data.....	33

Module 15 – Troubleshooting

Overview	2
Troubleshooting	3
Real-Time Systems	4
SBE 911 <i>plus</i>	5
NMEA Problems	23
Carousel Water Sampler	26
SBE 33 or 36 Deck Unit	28
Opto / NMEA Boxes	30
Internally Recording Instruments	32
Auto Fire Module (AFM)	36
Deployment Problems	37
Data Problems	38
Activity - Identify Instrument Damage	41
Activity - Troubleshoot Data	42

Module 16 – The Cruise: Before, During, and After

Overview	2
Pre-Cruise Equipment Checks	3
Verify Functionality	14
Shipping Precautions	16
Moored Instruments and Anti-Foul Paint	17
Tools and Spare Parts	18
Care and Maintenance During Cruise	22
Flooded Instruments	26
Care and Maintenance After Cruise	29
Care and Maintenance after Moored Instrument Recovery	30
Storage After Recovery	31

Module 17 – Basic Maintenance of Sea-Bird Equipment

Overview	2
Annual Maintenance	3
Lubricating Hardware	4
Electrostatic Discharge Precautions	6
Replacing O-Rings and Seals	7
Pumps	18
Replacing Bulkhead Connectors	21

Module 18 – Returning Instruments to Sea-Bird for Service

Overview	2
Sea-Bird Contact Information	3
Information Needed by Sea-Bird	4
Battery Shipping Regulations	7
Service Scheduling and Authorization	9
Service Package	11
Service Turn-Around Times	13
